### 8.2 Exposure controls

#### Appropriate engineering controls

Technical measures and the application of suitable work processes have priority over personal protection equipment.

Dust should be exhausted directly at the point of origin.

#### Protective and hygiene measures

Always close containers tightly after the removal of product. When using do not eat, drink, smoke, sniff. Wash hands before breaks and after work.

#### Eye/face protection

- Dust protection goggles.

#### Hand protection

- In case of prolonged or frequently repeated skin contact:
  - Wear suitable gloves.
  - Suitable material:
    - FKM (fluororubber). - Thickness of glove material: 0,4 mm
    - Breakthrough time >= 8 h
    - Butyl rubber. - Thickness of glove material: 0,5 mm
    - Breakthrough time >= 8 h
    - CR (polychloroprenes, Chloroprene rubber). - Thickness of glove material: 0,5 mm
    - Breakthrough time >= 8 h
    - NBR (Nitrile rubber). - Thickness of glove material: 0,35 mm
    - Breakthrough time >= 8 h
    - PVC (Polyvinyl chloride). - Thickness of glove material: 0,5 mm
    - Breakthrough time >= 8 h

The selected protective gloves have to satisfy the specifications of EU Directive EC/2016/425 and the standard EN 374 derived from it. Before using check leak tightness / impermeability. In the case of wanting to use the gloves again, clean them before taking off and air them well.

#### Skin protection

- Suitable protective clothing: Protective clothing.
- Minimum standard for preventive measures while handling with working materials are specified in the TRGS 500 (D).

#### Respiratory protection

- With correct and proper use, and under normal conditions, breathing protection is not required.
- Respiratory protection necessary at:
  - Exceeding exposure limit values
  - Insufficient ventilation. and Generation/formation of dust

Suitable respiratory protective equipment: particulates filter device (DIN EN 143). Type: P2-3
The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used.

Environmental exposure controls
No special precautionary measures are necessary.
